

27. Policy on Teach-Out Plans

Institutions must submit in a timely manner for Commission approval a written plan for the teach-out of its enrolled students when any of the following events takes place:

- The Department of Education has notified the Commission of an action against the institution pursuant to Federal Regulations, Section 487 (f) [20 USC 1099 b];
- The Commission has withdrawn accreditation from an institution;
- A State licensing or authorizing agency notifies DETC that an institution’s license or legal authorization has been or will be revoked; or
- The institution has notified the Commission that it intends to cease operations.

At a minimum, the proposed teach-out plan must ensure that all students who enrolled in the institution must receive all of the training or education under the terms of their contracts, to include receiving all learning materials and student services on a timely basis.
